## TuneTalk™ Stereo for iPod® video

Make high-quality stereo recordings with your iPod video

The Belkin TuneTalk Stereo for iPod video presents a great solution for iPod video users who have something memorable to capture. Now you can easily record memos, lectures, interviews, and conversations with two high-quality omnidirectional microphones. The iPod video's abundant storage capacity lets you store hundreds of hours of audio. You can easily review your audio notes later by using your earbud headphones or computer. You can also copy recordings to your desktop or notebook computer for storage, editing, or sending to others via email. The Belkin TuneTalk Stereo brings a whole new dimension to your iPod video—it's not just for tunes anymore!

**No software to install—support is already built into the iPod.**

### Benefits

- Optimizes recording quality easily in different environments, with shift-on-the-fly sensitivity switch
- Features auxiliary 3.5mm stereo-input jack for recording with an external microphone, or virtually any other audio source
- Includes USB cable for convenient syncing and charging of your iPod
- Navigates easily to recording menu with a single press of the "Quick Memo" button
- Indicates TuneTalk Stereo's recording status with lighted LED
- Provides limited case compatibility with extended connector
- Includes plastic spacer to provide additional stability when the iPod is not in a case
- Includes a portable stand for convenient placement of your iPod while recording
- Attaches securely to your iPod via the dock connector
- Works with iPod software version 1.1 or later
